## Current Project

---

**Title** : **Canteen Application.**

**Description:** The primary goal of canteen application project is to do all orders and work online without any hustle and bustle. This project all base on the basis of canteen which come in collages and offices. In that the student or employee just download the app and they register them as a customer and give the order to the canteen owner through this application. The order goes directly to the owner and the owner accept order and these order goes to the students or employee who order the food according to their table no.

**Technologies:** Java(Android), SQL Lite (database).

## Support Project

---

**Title : Agrocrafft(Website)**

**Description :** The primary goal of agrocrafft website to connect the farmer and customer directly through website. Where the customer directly order fruits, vegetable through farmer according to their area and availability. Customer don't need to go outside and purchase vegetables and fruits. Farmer also connect directly to customer and give the vegetables and fruits by their values.

**Technologies :** HTML, CSS, PHP, SQL etc.
